## ABOUT US

ONE CONTROLS was established by a team of experienced engineers and technicians specializing in PLC/SCADA based Control Systems and manufacture of custom electrical control panels. We offer top quality control solutions, whether simple electrical enclosures or complete systems, with comprehensive capabilities in control and automation engineering, custom control panel design and fabrication, electrical equipment installation.

ONE CONTROLS has adopted a policy to provide high quality in programming solutions, hardware control systems, and engineering services to the satisfaction and requirements of our customers.

We will respect and protect your confidential information and undertake sole responsibility of any assignment rendered to us. ONE CONTROLS will prove to be your choice business partner.

## INDUSTRY EXPERTISE

- Oil and Gas (Offshore & Onshore)
- Refineries
- Petrochemical
- Electronics/Manufacturing
- Utilities
- General Industries

## ENGINEERING

- Electrical & Control System Hardwire Design
- Power Distribution Design
- PLC Program Development
- HMI Development
- SCADA Development

## FABRICATION & ASSEMBLY

Our manufacturing facility utilizes the most current and up to date assembly and wiring methods available.

All system assembled and wired at One Controls will always receive a point-to-point test followed by a power on test and device operation tests.

## INSTALLATION & FIELD SERVICE

Installations are offered to our clients in order to offer Turnkey Service. Our services include:

- Site Survey
- Installation Subcontractor Management, Coordination, and Site Supervision
- System Start-up, Commissioning & Launch
- System Standby & Field Service
- Operator Training

## Fabrication of Container Control Room

We, One Controls provided the one stop service for fabrication of control room, Control Panel assembly on control cabin including Engineering capability in Design, Engineering, Fabrication, Assembly, Testing and Supply of Actuated Shutdown

# AUTOMATED ON / OFF VALVES

Expertise and capability in Design, Engineering, Fabrication, Assembly, Testing and Supply of Actuated Shutdown (SDV) and Blowdown (BDV) Ball Valve for Critical Process Lines in accordance to the Client's Specifications and applicable international standards such as API-6D, API-598, API-607, etc.

## Panel Assembly work on Zone 1 and Zone 2 panel

We are also specialized in panel assembly work and installation of PLC base instrument control panel and process control system panel in with zone 1 and zone 2 certified enclosure.

## Installation and commissioning of Field devices and instrument

We can provide the assembly and installation of field devices and tested according to proper procedure base on the standard that requested from client.

## Various type of PLC base panel building and testing

We can provide various type of PLC Pane wiring and assembly work base on client request. Moreover, Our skillful technician also can involved in both internal test and FAT with client within target deadline.
